PLAY ROCK ROLL

Skateparks a medida realizados por profesionales

BDU trabaja con X-Move para planificar y construir los mejores skateparks de hormigón de toda Europa. Llevamos el skateboarding al siguiente nivel.

Nuestros servicios incluyen **proyectos a medida realizados por skaters profesionales**, adaptados al entorno y al estilo de patinaje local. Para skateparks más pequeños, también disponemos de piezas singulares que se amoldan a todo tipo de espacios reducidos.

Las prioridades están claras: la **utilidad**, la **calidad**, el **diseño** y la **durabilidad**, virtudes que mantenemos a lo largo de la planificación y la ejecución.

Skateparks Lightweight

En ocasiones conviene instalar skateparks **versátiles y más ligeros**. Para ello ofrecemos la línea Lightweight con las siguientes características:

- Todos los elementos cumplen con los requisitos de la norma para skateparks DIN EN 14974.
- Todos los componentes (construcción, protección de bordes, remates, rieles) de acero están **galvanizados en caliente y firmemente conectados al hormigón**.
- Las pletinas de transición están fabricadas en **acero inoxidable**
- El peso de los elementos individuales es de un máximo de 1,8 toneladas. Por lo tanto, la instalación del skatepark puede ser **gestionada fácilmente por el cliente**.
- Los elementos **se montan directamente sobre una superficie existente** y se pueden anclar en la superficie.
- Hay varias combinaciones posibles

ELEMENTOS LIGHTWEIGHT DE HORMIGÓN PREFABRICADOS

ELEMENTOS LIGHTWEIGHT DE HORMIGÓN PREFABRICADOS

El mundo del skateboarding va mucho [más allá del simple acto de patinar](#). Nuestras pistas de skate hacen disfrutar del hormigón, de **desafiar todas las leyes** y sobre todo la de gravedad.

La motivación y el ansia por deslizarse, por sentirse un ave sin alas, por surfear, por expresar la rebeldía y ser el rey o reina de la calle. Cada maniobra es un sentimiento. **Ser libre y ejercerlo, pero con calidad.**
